Part C

III. Write in Detail

Describe the inventions made by Ancient People and how they were used?

Chikki Mukki Kal

It is known for its strength and durability, they rubbed these stones and create fire

Axe

The Axes were made to cut trees, remove barks, dig pits, hunt animals and remove the skin of animals

Fire

They used flintstone to make fire and used it to protect them from predators, for cooking food, and for creating light during the night

Wheels

When humans saw the stones rolling down from the mountains, probably they would have got the idea of making wheel

IV. Activity

1. Write an Essay on Importance of Invention of wheel from the ancient period to modern period.

1. Early hominids realised that round objects could be easily moved by rolling them.
2. Their descendants advanced this rolling technique into the transportation of large objects on cylindrical logs.
3. The invention of the wheel and axle allowed a rolling log to be placed through a hole in a wheel to create a cart.
4. Chariot racing was influential in the evolution of the spoked wheel as they allowed chariots to move much faster.
5. The invention of air filled rubber tyres allowed wheels to be much faster, sturdier and stronger
